

LS SERIES

GENERAL

Providing a wide range of applications with its polyamide material construction, LS series is level switches ensuring Normally On or Normally Off contact. It may be attached to the reservoir on the top or bottom. PP (Polypropylene) material is suitable for water and dilute acid applications and PA (Polyamide), SS (Stainless Steel) material for oil and fuel applications.

Material : PP or PA or SS

Temperature (max.) : -20°C +80 °C

Connection: M8 Thread

Output: 2-Wire or 4-Wire

Quantity of Contact: 1 x NO or NC

Electrical Connection: 250 VAC / 200 VOC 1,5 A Dry Contact

APPLICATIONS

Interstitial space of double wall tanks

Containment sumps

Dispenser pans

Other applications requiring the detection of a liquid leak

NF-LS

NF-LS-I
